Dear Hiring Manager,

I am excited to apply for the consultant, web developer role at NAB and am submitting my application in response to job number 788153. I believe that my technical skills, collaborative and inclusive approach, adaptability and problem-solving abilities align well with the goals and values of NAB.

As a graduate of The University of Melbourne with a Bachelor of Science in Computing and Software Systems, I have acquired a diverse range of skills and experience in software development and web application development. During my final year project, I gained hands-on experience with project management tools such as Notion and worked with the MERN stack to develop the Contact Saver App. Additionally, I gained experience in implementing agile methodologies while working on this project.

Currently, I am undertaking Monash University Full Stack Web Development coding bootcamp to upskill my web development coding skills and gain more practical experience. Additionally, I have also joined the Monash College Professional Year Program to improve my understanding of working in an Australian work environment.

Along with my technical skills, I possess strong non-technical skills, such as problem-solving, communication, and leadership. Through mentoring juniors at university, serving as a waitress, and leading a team of 10 people for dinner events, I have developed strong decision-making and strategic planning skills. I also have experience working collaboratively in group projects, which has honed my collaborative skills.

I am excited about the opportunity to contribute my skills and experience to NAB and would love to have the chance to discuss my application further. Thank you for your consideration, and I look forward to hearing from you.

Sincerely,
May Myat Noe Htet
