May Myat Noe (May) Htet

4304/442 Elizabeth Street, MELBOURNE VIC 3000 / 0405 517 173 /may.mn.htet@gmail.com

CAREER OBJECTIVE

To obtain a software developer/engineer internship at Rakuten advertising to utilise my technical skills to contribute to an organisation's innovative and creative software solutions/products with high collaborative and problem-solving skills.

EDUCATION

The University of Melbourne, Parkville   **Jul 2018 – Jul 2022**
Bachelor of Science (Computing and Software Systems)

PROJECT EXPERIENCE

Contact Saver App *(Final Year Project)*

As part of a three-member Davinci Backend Team, I contributed to the development of the Contact Saver App. My responsibilities included managing the project management tools and communication channels, implementing a weekly schedule and planning for stand-up and team meetings, and developing the backend using Node.js, Express, and Mongoose.

Additionally, I deployed the app to Heroku and created presentation slides to effectively communicate project progress and updates to stakeholders. Throughout the project, I gained expertise in Node.js, Express, and Mongoose, which enabled me to deliver results within a tight timeline. My contribution helped the team to complete the project on time, and I am proud to have been part of such a successful team effort.

Travel Wise Web App (Front-end Development Project)

As a member of a team of four, I contributed to developing the Travel Wise Web App. The object of this application was to provide travellers with useful information about various destinations such as a brief description of the city, weather, and currency.

During the project, I was responsible for implementing the currency exchange rate feature using Fixer API. My role involved working with the API documentation, integrating it into the application using HTML5, CSS, and JavaScript. Through this experience, I gained a deeper understanding of working with APIs and reading documentation to understand how they work.

Overall, this project gave me the opportunity to improve my technical skills and gain practical experience in developing web applications using various APIs.

SKILLS PROFILE

Technical Skills:

- Competency using different software development tools such as Visual Studio IDE, Git version control, Notion project management tool, and Zoom Collaboration tools demonstrated in my final year project
- Well-rounded experience in different coding languages such as JavaScript, HTML, CSS, Python, Java, C, and C# gained at University
- Knowledgeable in different software development methodologies such as agile, and waterfall, and experience working with agile methodologies while doing my final year project
- Solid experience working with MERN stack while participating in Coding Bootcamp
- Practical experience in Object-Oriented Programming demonstrated during University courses
- Sound practical knowledge of relational and non-relational databases such as SQL and MongoDB acquired through University courses and Coding Bootcamp.

Non-Technical Skills:

- Effective problem-solving skills acquired through informally mentoring juniors at University
- Clear communication skills demonstrated by communicating with guests in my role as a waitress
- Sound decision-making and good leadership skills demonstrated by leading a team of 10 people to serve for dinner events with over 100 guests
- Strategic organisational and planning skills demonstrated while fundraising and organising game events overseas
- Effective collaborative skills acquired through University and Bootcamp's group projects.
